Dear future mom:

Congratulations on becoming a new mom! With your planned induction of Labor coming soon, there are a few things you need to know regarding the day of your induction:

- You will need to be seen in our office 24-48 hours before your induction of labor for a check-up.
- Eat a light meal in the hours before your induction is to begin. You may take liquids as desired unless your physician wishes you to have nothing by mouth prior to the beginning of the induction.
- Call Labor & Delivery at (847) _____ two (2) hours before your scheduled induction. You will be told at that time if they have the ability to begin your induction as scheduled. If Labor & Delivery is not able to begin the induction at the time scheduled, (due to increased activity on the unit), they will notify you as soon as possible to reschedule your induction.
- Please go to the Admitting Department at least one (1) hour before your scheduled induction time. They will admit you and then bring you up to Labor & Delivery. If you are scheduled to come in after the lobby has closed, please use the Emergency Room entrance.

If you have any questions regarding the above, please call our office at (847) 680-3400.

Your Induction of Labor is scheduled for : _____ @ _____ am pm

At _____.
